1. Claims 1-38 remain for examination.
2. Claims 1, 8, and 26-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Beckwith et al, U.S. Patent No. 5,136,696.

The rejection is respectfully maintained for the reasons set forth in the previous office action incorporated herein by reference. (Prediction must be validated; col. 10, line 60)

3. Applicant's arguments filed November 4, 2005 have been fully considered but they are not persuasive.

Applicant argued that the reference does not teach sequencing microinstructions out-of-order.

The reference teaches sequencing microinstructions based upon branch prediction, and out-of-order sequencing occurs when sequencing is based on wrong prediction.

Furthermore the claims do not recite such a limitation.

Applicant further argued that the reference does not teach a three way superscalar processor. The stack taught in the reference can be incorporated in any processor including a three way superscalar processor.

Art Unit: 2111

4. Claims 2-7 and 9-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
